

## About Us

We work with industrial water users looking for new solutions to economically recover more water from their wastewater processing streams. Membrion has created a high performance and cost-effective ceramic ion exchange membrane for industrial water treatment systems that enables companies to significantly increase water recovery rates and reduce wastewater stream volumes.

At Membrion, we believe that our culture of creativity, transparency & fluidity is what inspires the confidence of our customers and partners. In just 6 short years, our company has grown to a team of 22 people (and growing!) who have enabled our company to make extraordinary progress, including building a pilot membrane manufacturing facility and improving the water treatment capabilities of more than a dozen customers. Our product is built on more than 40 patents, has won a prestigious R&D 100 Award and has been covered by numerous media outlets. You can learn more at: [www.membrion.com](http://www.membrion.com).

**Job Title:** Production Technician

**Position Type:** Full-time employee

**Location:** Seattle, WA

**Compensation:** Salary range: \$48k- \$55k, depending on experience and skillset. Package includes benefits and stock options.

## Desired Skills

Industrial Manufacturing, Equipment Maintenance, Strong Mechanical Ability, Highly Organized, MS Office. A high school diploma or a GED is required for this position. A Technical or Undergraduate degree is preferred.

## Job Description

Membrion is seeking a highly motivated, detail oriented, and organized individual to be a part of our membrane manufacturing team. This person will carry out and improve upon established production processes to help us consistently produce a high-quality product. In this role, you will:

- Set up and operate production equipment
- Monitor equipment to maintain required productivity levels and quality standards
- Perform routine equipment maintenance
- Sample and test raw materials, intermediates and finished products
- Run quality control tests to ensure that membranes meet performance specifications
- Process membrane sheets and assemble membranes into commercial stacks for sale to customers
- Perform acceptance tests and package modules for shipment to end-users
- Update and manage inventory
- Document production information via daily system logs
- Maintain a safe, clean, and organized production environment

We strongly encourage groups that are historically underrepresented to apply. Most importantly, we're looking for someone that wants to help build a company that does good for the world around us.

If you think you might enjoy working for a fast-growing start-up company with excellent prospects for future growth opportunities, please send an email with your resume to [jobs@membrion.com](mailto:jobs@membrion.com).
